

# Piranha Magro P180

## SPECIFICATIONS:

**Length: 18'**

**Draft: 8" - 10" Under Load**

**Beam: 90"**

**Hull Weight: 1,050 lbs**

**Max HP: 90-150**

## STANDARD FEATURES:

**All Hand Laid Fiber Glass**

**Forward Casting Deck**

**Rear Helm Cushion**

**Bow and Stern Eyes**

**Rear Deck**

# Piranha Magro P180

The Magro P180 is the next generation in shallow water skiff design. Chris Morejohn's career as a boat designer and builder has spanned 40 years and hundreds of boats. The Magro P180 is a compilation of all his previous designs brought into the 21st century. The design took into consideration the extra weight needed for today's gear. Shallow water anchors, trolling motors, coolers, tackle and much more add to the increased loads needed to hunt your favorite species. The design produced a hull that can manage speeds of close to 50 mph in open water and the buoyancy and improved tracking while poling through the shallow water. The lower reverse and upper spray chines offer an extremely dry ride. The sharp entry of the bow makes for a smooth ride in open bays and waterways. This is the coming revolution in shallow water site fishing. Get predacious in new Magro P180 skiff.

## Specifications

Length 18'  
Draft 8-10" under load  
Beam 90"  
Hull Weight: 1050 lbs  
Max HP: 90-150

## Standard Features

All Hand Laid Fiber Glass  
Forward Casting Deck  
Rear Deck  
Rear Helm Cushion  
Bow and Stern Eyes

## Optional Features
